

WOODS • PEACOCK

ENGINEERING CONSULTANTS

Woods • Peacock is looking for talented people interested in developing and advancing a professional career in structural engineering related to building structures. Our projects vary in size and complexity, providing opportunities to grow and challenge your technical skills and develop and hone your management skills. Project assignments are assigned based on your ability, strengths, and motivation.

Position:

- Full-Time Entry-Level Structural Designer

Location:

- Alexandria, VA

Responsibilities:

- Perform analysis and design of structural systems for all types of building materials using various building codes
- Participate in field surveys and document existing conditions
- Communicate and coordinate with architects and engineers of other disciplines
- Review and evaluate existing building structural systems
- Prepare drawings using AutoCAD and Revit
- Write reports
- Review construction submittals, participate in construction observation, and respond to contractor inquiries

Qualifications:

- Bachelor of Science in Civil Engineering (B.S.C.E.) with coursework specialized towards structural engineering or Bachelor of Architectural Engineering (B.A.E) with emphasis in structural engineering. Master's Degree (M.S.C.E or M.A.E) a plus.
- EIT strongly preferred
- Excellent verbal and written communication skills
- Working knowledge of Microsoft Office, AutoCAD, Revit, & current industry structural engineering design software; advanced computer skills a plus
- Good organizational and team skills
- Ability to work in a fast-paced environment
- Willingness to be challenged and develop new skills
