Entry Level Electrical Engineer

Atlantic Design Group, Inc. is seeking an entry level Electrical Engineer. The ideal candidate has excellent communication and technical skills, a strong work ethic, and desire to work in a multi-disciplined, collaborative environment. An Architectural Engineering degree with an emphasis in electrical or lighting systems or an electrical engineering degree is desired, with preference given to an individual with an EIT. Revit and AutoCAD experience a plus.

ADG desires to provide entry-level engineers with real-world project experience designing a wide variety of systems, to empower them to grow as a young engineer and advance in their career. Entry level engineers will be exposed to all phases of the project, from proposal to the final design submittal and through to the construction phase.

Electrical engineers at ADG design power, lighting, fire alarm, communications, and a variety of special systems on highly complex projects located across the US and overseas. Building types include various healthcare facilities including hospitals, out-patient clinics, and lab research facilities as well as a variety of office spaces for government and commercial clients. LEED and energy-efficient design incorporated into almost all projects.

ADG encourages prospective candidate to apply for security clearance. Due to ongoing contracts, US citizenship is required.

ADG is conveniently located between the Baltimore/Washington metro areas, in Columbia, MD.

ADG, Inc. offers a competitive salary with a comprehensive benefits package. The benefits package includes subsidized medical and dental, no cost disability and life insurance, paid time off (PTO) & 401k plan with company matching.
