SEAN O'CONNOR LIGHTING CAREERS

Lighting Designer - Los Angeles, CA

Founded in 1997 and located in Los Angeles, Sean O'Connor Lighting is a renowned architectural lighting design firm with a commitment to design excellence. Led by Sean O'Connor, IALD, MIES, the practice is dedicated to the design of environments which is a synthesis of light and space.

Understanding that inspiration is born from a wide range of influences, Sean O'Connor Lighting has built an award-winning team of designers with a diversity of backgrounds in architecture, interior design, theatrical design, fashion design, and product development.

We have positions available in our Los Angeles studio for junior designers with excellent visual communications skills and a passion for architecture and light.

The position of Lighting Designer requires a bachelor's degree in Architecture, Engineering, or Design ideally with a lighting focus. In this position, you would be responsible for working on world class projects in workplace, retail, and civic with a major focus on hospitality and luxury residential projects.

Duties & Responsibilities:
   – Conceptualizing light in 3D space and integrating lighting design with architecture
   – Working directly with project manager to manage overall project scheduling
   – Creating lighting plans, elevations, installation details, light level calculations, energy calculations, and light fixture schedules under the direction of a senior designer
   – Collaborate and initiate ideas with the project team in the design process (developing ideas, bringing ideas to the table) and in the production of interior architectural lighting design and construction documents on all project types
   – Assisting in generating information to the field such as RFIs
   – Assist and collaborate with the project team in producing presentation materials and in presenting designs to clients and other consultants
   – Maintaining project binders, project logs and records
   – Interacting with various consultants on projects
   – Attending project meetings and site visits with senior team members

Qualifications:
   – Up to three (3) years of lighting industry experience
   – Proficiency in AutoCAD

- Proficiency in Revit
- 3D Modeling or rendering experience
- Fluency with MS Office (Excel, Word, Outlook)
- Excellent attention to detail
- Ability to work independently and as part of a team
- Excellent written and verbal communication skills and English proficiency
- Efficiency in Adobe Creative Suite (InDesign, Acrobat, Photoshop, Illustrator)
- AGI or other lighting calculation software
