

Now hiring: **Structural engineers**

- **Engineers**
- **Project Engineers**

Silman, one of the country's most recognized structural engineering firms, is looking for exceptional architectural or structural engineers with 0-5 years of experience to join our **New York City, Washington DC, Boston, and Los Angeles** offices. Our 165 employees bring a collaborative and creative ethos to rewarding and challenging projects that span a broad spectrum of building and material types.

The firm's projects range from new construction and renovation to adaptive reuse and preservation and include many high-profile projects with renowned architects and other design professionals. We also have a long history of pro-bono contributions to projects that support and enrich communities through social initiatives and nonprofit organizations.

Silman offers excellent benefits, including time-and-a-half for all overtime, four-day summer work weeks, and a generous benefits package. We place importance on a healthy work-life balance; our wellness program options include meditation, yoga classes, and fitness boxing classes. The firm sponsors various co-ed sports teams and encourages participation in events organized by the architectural and engineering community, including pro-bono and charity functions.

Our six offices are located in New York City, Washington DC, Boston, Ann Arbor, Chicago, and Los Angeles. After hours, our engineers take advantage of the rich social and cultural life of the cities where our offices are located. Silman is an equal opportunity and affirmative action employer.

If you would like to begin or continue your career at a dynamic, growing firm, please visit silman.com/careers to upload your resume, cover letter, and unofficial transcript. Please indicate in your cover letter which office location would be your first choice.
